

Child Development

General Information:

During the elementary years children continue to change and grow. Parents need to continue to grow and adapt parenting to the differing needs of their children. Being parents can be hard. At MBS we hope to help support not only your children but also provide information that will help to guide parents in that journey. We invite you to keep the doors of communication open by being at school for events and stopping by the elementary school office during office hours to discuss any questions or doubts that arise. We also would like to share sites of the web where you can find up to date information about child development.

Website Links:

<http://www.childdevelopmentinfo.com> This site focuses on the development of toddlers through preschool age children and what you should expect during this time of development

<http://www.kidsgrowth.com> This site explains the "growth milestones" for each grade and even translates the information into Spanish.
